302 SERIES HAND PUMP

302 Hand Pumps are designed to dispense 1 ounce (30 milliliters) of detergent, sanitizer or other chemical into kitchen sink, bottle, machine, or any open container where chemical is mixed with water. Each push delivers 1 ounce with the pump automatically maintaining its prime for future use.

- Provides efficient product management
- **Saves money**
- Delivers 1 oz. of pure product per push
- Allows user to measure exact dosage accurately
- Eliminates free hand pouring of product
- Eliminates guess work and human error
- Controls detergent consumption
- Does not use electricity or batteries
- Small overall size takes up less wall space
- Mounts on any vertical or horizontal surface
- Discharge chemical through tubing or optional spout

Various racks are available for 1 gallon containers in locking and non-locking configurations. All racks are metal wire and feature a powder coated finish for durability and chemical resistance.
