# Pro-Fill

## The Premiere 1 Product Sink Dispenser

Pro-Fill sets a new standard in performance and efficiency for sink dispensing. This unit offers greater reliability, durability and easier serviceability in a more compact size. Pro-Fills' attractive and ergonomic design takes up less wall space yet provides more label space for product identification and operating instructions. This unit mixes detergent with water before dispensing the solution into your wash sink and is designed to increase the yield from any size container to which it is connected. Your total cost of ownership is lowered due to the use of an all metal manifold for greater durability and a easy to remove front cover for faster wall serviceability.

- Provides efficient product management
- **Saves money**
- Dispenses mixed solution
- 14 different concentration proportion settings
- Eliminates manual mixing of solution
- Eliminates guess work and human error
- Controls detergent consumption
- Controls water consumption
- Does not use electricity or batteries
- Easy to use (simply turn switch on and off)
- Small overall size takes up less wall space
- Easy fast access to service without removing the unit from the wall
